F-287 G

28% MANGANESE

F-287 G 28% Manganese delivers powerful, plant-available manganese in every granule – so you can correct deficiencies before they impact your yield. With 28% manganese and a touch of sulfur, this premium fertilizer is engineered to work fast in the root zone while also building long-term soil health. Its uniform granules blend easily into fertilizer mixes and apply smoothly across the field, giving you reliable coverage, season after season.

✓ All crops

✓ 35% Sulphate;
65% Oxide

✓ Accelerates germination and maturity, while increasing the availability of P and Ca.

**Will stain sidewalks & pools.
Sweep off before moisture
contacts product.**

Product Specifications

Guaranteed Analysis
28% Manganese

Particle Size (SGN)
220 SGN

Bulk Density
90 - 95 lb/ft³

Salt Index
15

Product Volume for
1 lb actual
3.5 lbs

Precision Nutrition, Proven Results

- Manganese is vital for photosynthesis, enzyme function, and nitrogen metabolism – processes that drive plant vigor and yield. F-287 G supports strong early growth, uniform development, and greater resilience. Backed by field-proven performance, it provides the consistent nutrition needed for optimal yields.

Application

- Apply based on soil test and/or tissue test results.
- Broadcast blend: 4-20 lb product/acre (equals 1.25-5.7 lb actual Mn/acre)
- Side-band at planting: 3.5 lb product/acre depending on soil test and crop needs. (equals 1 lb actual Mn/acre)
- Follow normal blending procedures.
- Refer to the Critical Relative Humidity Index prior to adding additional products to the fertilizer blend.
