F-420 G

20% ZINC

F-420 G 20% Zinc is a premium zinc granule delivering a powerful one-two punch: quick-release sulfate for early-season uptake and slow-release oxide to feed the crop over time. With a low analysis for even distribution, it blends smoothly with dry fertilizers and spreads evenly across the field. F-420 G gives you the coverage, consistency, and confidence to push for stronger starts, healthier growth, and better yields.

- ✓ Compatible with all fertilizer blends
- ✓ Optimum water solubility
- ✓ All crops
- ✓ 40% Sulphate; 60% Oxide

Product Specifications

Guaranteed Analysis

20% Zinc
8% Water Soluble Zinc

Particle Size (SGN)

235 SGN

Bulk Density

90 - 95 lb/ft³

Salt Index

Precision Nutrition, Proven Results

- Zinc plays a vital role in enzyme activation, protein synthesis, and hormone production—critical for healthy growth, root development, and stress resistance. F-420 G supplies zinc in a blend of immediate and reserve forms, supporting strong seedling establishment and lasting nutrient availability for healthier, more resilient crops and consistent yields.

Application

- Intended to be soil applied in N-P-K fertilizer blends.
- Broadcast blend: 10-25 lb product/acre (equals 2-5 lb actual Zn/acre)
- Side-band at planting: 5-15 lb product/acre depending on soil test and crop needs. (equals 1-3 lb actual Zn/acre)
- Follow normal blending procedures.
- Refer to the Critical Relative Humidity Index prior to adding additional products to the fertilizer blend.
